

e-CAMView Release History

Release Number	Release Date (dd/mm/yyyy)
1.0.65.30	22/01/2020
1.0.65.29	16/12/2019
1.0.65.28	25/11/2019

Software Requirements

1. Windows 8.1
2. Windows 10

Package Name	e-CAMView_Streaming_Application_1.0.65.30_Windows_20200122
Release Date	22-Jan-2020
Version	1.0.65.30

Bug Fixed

1. The ROI and Frame rate issue while recording issues are solved for See3CAM_CU20.
2. while video recording device unplugged and if there is another device connected, its preview will start only after the user click "OK" on prompt box.
3. Changed the code to get the device extension control with exact Vid and Pid.

Known Issues

1. Make sure you Uninstall the previous e-CAMView versions (i.e. less than the 1.0.65.0) manually before installing
e_CAMView_Streaming_Application_1.0.65.26_Windows_20191112.

Limitations

1. While recording with e-CAM22_USB device, the FPS shown in the status bar is the preview FPS which will be different from the actual recording FPS.
2. Video recording is not supported in Windows-7.
3. See3CAM_CU1317 and e-CAM22_USB devices are not supported in Windows-7.
4. Audio recording is disabled for e-CAM22_USB device.

5. For e-CAM22_USB, H264 video recording Supports maximum 30 fps.
