

DASL 130 – C Programming Course

Assignment 1

Due July 15th at 10 AM

- 1) Create a program that reads in a temperature in Fahrenheit, from the input as a float, and converts it to Celsius and prints the result.
- 2) Create a program that reads in a sequence of chars and prints the equivalent char ASCII values
- 3) Create a program that reads in a sequence of numbers and adds them together, printing the result at each iteration, until the total sum reaches 100
